	COLLABORATE Space 90-day license

## COLLABORATE VERSA 50

3. Connect up to two room displays to the DVI and HDMI output port on the VERSA hub.

4. Connect the VERSA hub to the power supply. Connect the VERSA hub to the network (optional) if the laptop needs network connectivity.

## QUICK-START GUIDE

5. To cast a laptop screen onto a display via USB 3.0, install the DisplayLink driver (one time installation) onto the laptop. You can download the driver from:

[www.displaylink.com/downloads](http://www.displaylink.com/downloads)

Note: If a Windows 10 laptop comes with the DisplayLink driver pre-installed, it does not need to be installed separately. The VERSA hub has been tested with DisplayLink driver version 8.2.1999.0.

6. Connect your laptop to the USB 3.0 input port on the VERSA hub.

Please Note: The UNITE 50 camera is powered over the connected USB cable and requires 600mA @5V at the USB port on the camera.

ClearOne has tested the Unite 50 with our 10m and 30m Fiber USB 3.0 cables and as long as they are connected to USB source providing sufficient power, they will power the Unite 50 camera
